Science	Ch.7 Solids, liquids and gases	<p><u>11.05.20</u> Read the chapter thoroughly and write the following in your notebook.</p> <p>I. <u>Word Bank:</u> Solids, liquids, Matter, molecules, evaporation, condensation, melting, freezing, steam, compresses, weight, volume</p> <p>II. <u>Choose the correct option:</u></p> <ol style="list-style-type: none"> Water exists in <u>three</u> forms. (two/three) When water is frozen , it becomes <u>ice</u>. (steam/ice) Steam is this form of water- <u>gaseous</u> (solid/ gaseous) The molecules are the most closely packed in <u>solids</u>.(liquids/solids) <p><u>13.05.20</u></p> <p>III. <u>Fill in the blanks:</u></p>	<p>https://youtu.be/862hkxvz8VA</p>

		<p>1. Pieces of <u>ice</u> are solids and have a definite shape.</p> <p>2. The <u>gases</u> have no definite volume, shape or size.</p> <p>3. Matter has <u>weight</u> and it occupies <u>space</u>.</p> <p>4. Water flows easily, because it is a <u>liquid</u>.</p> <p><u>16.05.20</u></p> <p>IV. <u>Answer these questions:</u></p> <p>1. What is matter? Ans. Anything that occupies space and has weight is called matter.</p> <p>2. Write any two differences between solids, liquids and gases.</p> <p>Ans.</p> <table border="1"> <thead> <tr> <th>Solids</th> <th>Liquids</th> <th>Gases</th> </tr> </thead> <tbody> <tr> <td>1.They have definite Shape and size.</td> <td>1.They have fixed volume but no fixed shape</td> <td>1.Gases have no fixed volume and shape</td> </tr> <tr> <td>2.The molecules in solids are very closely packed.</td> <td>2.Molecules have spaces in between them</td> <td>2.Molecules are far from each other</td> </tr> </tbody> </table> <p>3. Define : i. evaporation , ii. condensation</p> <p>Ans. <u>Evaporation</u> – The change of water into water vapour on heating is called evaporation.</p> <p><u>Condensation</u> – The change of water vapour into water on cooling is called condensation.</p> <p>4 . Differentiate between melting and freezing</p> <p>Ans</p> <table border="1"> <thead> <tr> <th>Melting</th> <th>Freezing</th> </tr> </thead> <tbody> <tr> <td>The process of changing a solid into liquid Is called melting.</td> <td>The process of changing liquid Into a solid is called freezing.</td> </tr> </tbody> </table> <p>5.Draw molecular arrangement of solid, liquid and gas.</p>	Solids	Liquids	Gases	1.They have definite Shape and size.	1.They have fixed volume but no fixed shape	1.Gases have no fixed volume and shape	2.The molecules in solids are very closely packed.	2.Molecules have spaces in between them	2.Molecules are far from each other	Melting	Freezing	The process of changing a solid into liquid Is called melting.	The process of changing liquid Into a solid is called freezing.	
Solids	Liquids	Gases														
1.They have definite Shape and size.	1.They have fixed volume but no fixed shape	1.Gases have no fixed volume and shape														
2.The molecules in solids are very closely packed.	2.Molecules have spaces in between them	2.Molecules are far from each other														
Melting	Freezing															
The process of changing a solid into liquid Is called melting.	The process of changing liquid Into a solid is called freezing.
