

### Personal Profile ( sample)

Write a personal profile for admission in a well- known college of your city to study Literature based on the following points.

Personal traits- academic achievements- achievements in extra curricular activities- sports- leadership qualities- future plans and aspirations.

### Personal Profile

I am a self-motivated, optimistic and honest person. I try to achieve the target once set. I have always performed well in my studies. I scored 95% marks in aggregate in my class X examination and 96% marks in class XII. I have won a number of laurels for my school in Intra and Inter- School Competitions like Elocution, Debate and Drama. In the year 2018, I was selected as the Head Girl/ Boy of the school and proved myself one of the best Head Girls/ Boys of the school.

I like studying and have taste of all the genres but I love to study English Literature and want to study in a well reputed college that will help me to pursue my career goal to become a successful professor. Teaching is a noble profession and being professor, I would light the candle of education in the heart of many students. It will also help me to help the people of poor strata, by educating them with their rights. I am inspired with the quote, "Education is not the preparation for life but life itself." My plan is to explore and contribute as a writer to the literary world. Form class 5 onwards, my interest in football saw me become a part of the junior football team of our school. With time, my interest increased and I led the senior school football team as the captain. I have always been a team player and have performed well in roles of leadership. I

have also been an active member of the eco-club and performed a lot of activities- roadside skits, donation camps, quizzes, competitions and cleanliness drives for the same.

I feel that my strength lies in the fact that I devote my entire focus and attention to the task entrusted to me. I feel that what sets me apart from others is the kind of devotion and determination I can bring to the work I do. I think that I will prove to be an active student of your college who will contribute, both academically and through co- curricular activities, in taking your college to greater heights.

With this kind of determination and optimistic thought, I am sure I will turn all my dreams into reality.
