courage and the leopard sprang into the thickets without any sound

2. "There's a leopard about," they told me. "You should carry a gun."

a. Who are the 'they' in these lines? How did 'they' know that there was a leopard around?

b. What change could be seen in the forest with their arrival?

Answers-2. The they in these lines were the hunters, who were searching for the leopard. They knew that there was a leopard around, as they had seen the carcass of the deer that the leopard had partially eaten and the leopard's pug marks.

b. After the arrival of the hunters, the animals were scarcely visible in the forest-fewer birds were seen and even the langurs had moved somewhere else.

Answer these questions.

1 Why had the ravine become a little haven for

			<p>wildlife?</p> <p>2. Which animals did the author regularly see and hear every morning?</p> <p>3. Why were the birds and animals not disturbed by the presence of the author in the forest?</p> <p>4. What reason does the author give for the presence of a leopard so close to Mussoorie?</p> <p>5. Briefly describe all that the author saw and felt when he reached the top of Pari Tibba.</p> <p>B. 1. The ravine was so deep that for most of the day it remained in shadow, encouraging many birds and animals to come out of their hiding places even in the daylight. Besides, only a few people ever passed that way, due to which the ravine had become a little haven for wildlife.</p> <p>2. Almost every morning, the author could hear the cry of a barking deer, as</p>

well as see the pine martens and a red fox. He also saw footprints, which he recognized as that of a bear. He saw langurs in the oak and rhododendron trees, munching up tender green shoots of the oak tree.

3. According to the author, the birds and animals had become accustomed to his face as he passed through the forest everyday, and came to realize that he was someone who had not come to take anything away from them or the jungle. Therefore, they were not disturbed by his presence in the forest.

4. Although the author was surprised to see the leopard so close to Mussoorie, he realized it must have been there because it was nearing extinction, like other members of the cat family.

5. Pari Tibba was a bleak, scrub-covered, uninhabited hill, which was difficult to climb. As the author

			<p>climbed it, he was 'struck by the silence that surrounded the place - a silence that was shouting in his ears. Then he suddenly felt a strong feline odour, but could not see anything. He thought he had discovered the leopard's lair and that the animal itself was probably watching him from inside the darkness of the cave, recognizing him as a man who walked alone in the forest without a weapon. The author also thought that the leopard acknowledged his visit in the friendliest way, by ignoring him altogether.</p>
